Summary

AI powered Full Stack Developer with 3+ years of experience building responsive and dynamic web applications using React.js, Next.js, and Node.js. Skilled in creating clean, scalable user interfaces, developing RESTful APIs, and integrating third-party services to deliver smooth, high-performance experiences. Experienced in providing technical support, troubleshooting issues, and collaborating cross-functionally to ensure timely delivery with attention to detail.

Professional Experience

Ahmasoft

02/2025 – Present | Lahore Pakistan

Senior Full Stack Engineer

- Developed and enhanced web applications using React.js, Next.js, and Redux Toolkit, building dashboards, tables, filters, and responsive UI components.
- Worked with backend APIs and server endpoints, managing data flow and implementing features like search, pagination, sorting, and export.
- Performed testing and application support, fixing UI bugs, responsiveness issues, and resolving production problems.
- Improved performance using code-splitting, memoization, and optimized rendering, while maintaining responsive layouts with Material UI, Bootstrap, and custom CSS.

Aleedz Solutions

08/2024 – 02/2025 | New Zealand

Full Stack Engineer

- Developed and maintained the full frontend using React.js and Redux Toolkit, building dynamic dashboards, responsive data tables, advanced filters, multi-level dropdowns, modals, and image previews.
- Provided technical support by diagnosing UI/API issues, coordinating with backend teams, and resolving production bugs to maintain application stability.
- Integrated APIs with Axios for real-time data fetching and updates, implemented pagination, search, sorting, and Excel export using XLSX to improve reporting and data accessibility.
- Applied performance optimizations using React.lazy, Suspense, useMemo, React.memo, and useRef, along with debouncing and virtualized tables for efficient rendering.
- Implemented conditional rendering, real-time form validation, PDF/image handling, and interactive UI workflows to enhance user experience.
- Styled UI with Material UI, Bootstrap, and custom CSS, ensuring a fully responsive and user-friendly interface across devices.

Voyage Freight

11/2023 – 08/2024 | Lahore

Junior Frontend Developer

- Developed client-side and admin-side features using React.js and Next.js, building modular, SEO-friendly, and maintainable frontend applications.
- Assisted in support workflows by triaging client-reported issues, reproducing bugs, and delivering timely fixes to ensure smooth platform operations.
- Managed state with Redux Toolkit, handled dynamic data via Axios, and implemented JWT-based authentication for secure login and registration flows with real-time form validations.
- Created interactive dashboards, tables, filters, and modals, integrating PDF generation via PDF-Kit and responsive UI mockups for enhanced data visualization.
- Styled the application using Material UI, Bootstrap, and custom CSS, ensuring fully responsive layouts across desktop, tablet, and mobile devices.
- Optimized performance with React.memo, useMemo, useRef, and lazy loading using React.lazy and Suspense to reduce load times and prevent unnecessary re-renders.
- Applied clean UI/UX principles, conditional rendering, and real-time data handling to deliver a smooth and user-friendly experience.

Technical Support & Troubleshooting

Projects

MysticShop – Ecommerce Platform

Technologies: React, Node.js, MongoDB

- Designed and developed a full-stack e-commerce platform supporting product browsing, user authentication, and secure account management.
- Implemented shopping cart functionality allowing users to add, update, and manage products before checkout.
- Integrated Stripe payment gateway to enable secure online payments and a seamless checkout process.
- Built RESTful APIs using Node.js and managed product and user data with MongoDB to support scalable backend operations.
- Created responsive frontend interfaces using React to deliver a smooth and intuitive shopping experience.

AR Admin Dashboard

Technologies: React.js, Material UI, Node.js, MongoDB

Key Features & Achievements:

- **Interactive Dashboards:** Integrated dynamic charts and graphical reports for intuitive data visualization.
- **Responsive Design:** Built fully adaptable layouts ensuring a smooth user experience across desktop, tablet, and mobile devices.
- **Clean & Intuitive UI:** Designed an organized structure for easy navigation and improved usability.
- **Deployment:** Successfully deployed it.

House Marketplace – Real Estate Web App

Technologies: React, Firebase, Mapbox

- Developed a property listing web application that allows users to browse, search, and explore real estate listings through an interactive interface.
- Implemented user authentication and secure login using Firebase, enabling users to create accounts and manage their listings.
- Integrated Mapbox to display property locations on an interactive map, helping users visually explore nearby listings.
- Built responsive UI components with React to ensure smooth navigation and a user-friendly experience across devices.

Education

BS Computer Science

The Islamia University Bahawalpur

Intermediate

Govt, Sayad Nasr Ul Deen Shah Degree College
Gogran, Lodhran

Certificates

Microsoft | MicroSoft FrontEnd Devolper •
IBM | Developing Front-End Apps with React •
Packt | Advanced React Projects and Ecommerce
Development | Coursera
